How to refine your search results

- A Change the radius of your search.** By default the search will show dentists within 15 miles of a given location, but you can adjust this distance by clicking on **Refine search** and selecting any distance from “5 miles” to “60 miles” from the drop-down menu.
- B Filter your results.** Refine your search results by categories such as specialties and languages.

The screenshot shows the 'Find a Dentist' interface. At the top, there is a search bar with the text 'Dentist, office or keyword' and a location field set to 'San Francisco'. A callout 'A' points to the '+ Refine search' link next to the location field. A callout 'B' points to the '+ Refine search' link in the top right corner of the search results area. The search results show a map of San Francisco with several dentist locations marked. Below the map, there are three dentist profiles: Charles Nip, Albina Batchaeva, and Tiklat Issa. Each profile includes their name, title, distance from the location, and a 'Details' link. The 'Refine search' menu is shown on the right, with options to sort by 'Best Match' or 'Distance' (15 miles) and filters for 'Networks', 'Specialties', 'Languages', 'Extended office hours', 'Office access', and 'Board-certified'.
